

MorphoTrak MA SIGMA Series implements the design cues from today's most intuitive consumer electronics, for fast user adoption. With all new enhanced fingerprint technology with additional anti-fraud and anti-"buddy punching" features, MorphoTrak makes sure your security is fully met. Thanks to the new generation Morpho algorithms (MINEX and FIPS 201 approved) accuracy is maintained regardless of the number of users. As the World's most accurate fingerprint technology, MorphoTrak is fresh, intuitive, flexible, and has the aesthetic qualities to meet your most demanding security needs.

Biometrics

partnered with

ENTERTECH SYSTEMS provide market-leading intelligent identity management solutions to systems integrators and key markets, including critical infrastructure, enterprise, education, and many more verticals. Entertech biometrics for IP access control systems and workforce management solutions are purpose-built to overcome the three main obstacles to mainstream adoption: cost, complexity and on-boarding users. BioConnect's advanced template management enables Supremas biometric readers to be easily integrated with leading global access control systems.

Pro-Watch® 4.2

THE KEY TO SUCCESS

The final piece to your integration puzzle!

True Open Platform for Maximum Flexibility!

Intended to truly offer a one-of-a-kind integration platform, Pro-Watch® 4.2 offers numerous lockset and biometric choices to meet your specific demands.

Check out the benefits and features each company provides!

Wireless Locksets

ASSA ABLOY

The global leader in door opening solutions

Aperio is a global wireless platform that allows you to expand your access control footprint—quickly, easily, and affordably—using existing platforms you trust. Aperio technology reduces the cost and inconvenience of traditional access control—without the hassle of complex site surveys. It utilizes local wireless communication between the lock and a communications hub to connect to an online electronic access control system. This offers facilities an easy, affordable way to expand the reach of existing access control systems and secure additional openings.

Designed with an open platform that offers integration, scale, and flexibility, Pro-Watch® 4.2 delivers the ideal blend of versatility and cost-effective performance.

Save time and money while gaining a system that performs at the highest of levels.

SALTO
inspired access

Sallis technology enables users to expand their existing access control system for a much more powerful solution. This cost effective solution provides opportunities to extend the reach of your existing access control system to areas traditionally under lock and key. The stand alone wireless devices are easy to install and they permit you to use existing credentials to avoid expensive migration costs. Thanks to the huge range of Salto products, virtually any kind of door can be equipped with Sallis stand alone access control technology.

ALLEGION™

Schlage AD Series locks combine the components typically found around the door (reader and exit switch) into one cost effective unit. This not only saves costs but the integration simplifies installation. And since they are designed to be modular, Schlage AD Series locks can easily be upgraded in the future to meet your changing security and technology requirements. AD Series wireless locks provide many of the key benefits of a hardwired system including real-time monitoring, audit trails, centralized lockdown and instant access control management.
