

## ■ PORTABLE PROPORTIONERS DZ1000 AND DZ1000 LIGHT FOR MAXIMUM FLEXIBILITY IN MOBILE USE

### DZ1000 LIGHT

↔  
FROM FIXED  
TO PORTABLE IN  
JUST 1 MINUTE

- Proportioning rates: 0.1% for wetting agent, 0.5% and 1% for extinguishing foam
- Wetting agent production at a flow rate from 80 l/min
- Extremely compact: 500 x 406 x 317 mm (L x W x H)
- Low weight: < 25 kg, can be carried by one person

### DZ1000

- Proportioning rates: 0.3% for wetting agent, 1% and 3% for extinguishing foam
- Wetting agent production at a flow rate from 90 l/min
- Dimensions: 670 x 410 x 320 mm (L x W x H)
- Weight: 45 kg, can be carried by two people

Easy switching between  
proportioning rates

Rugged and  
Built-to-last

For all common  
foam agent types

## ■ THE INNOVATIVE ALTERNATIVE TO VENTURI PROPORTIONERS

The DZ1000 and DZ1000 light portable proportioners have been developed, especially for different firefighting scenarios. Highly versatile for mobile use, they guarantee precise foam concentrate proportioning across the entire operating range, from 120 l/min to 1000 l/min. It takes only a few turns to switch between the proportioning rates of 0.3%, 1% and 3% (DZ1000) or 0.5% and 1% (DZ1000 light) during operation.

Also suitable for producing wetting agent.

The reduced surface tension allows the wetting agent to deeply soak into the substance on fire.

## ■ 2-IN-1 SOLUTION: FOR INSTALLATION IN FIRE ENGINES AND MOBILE USE

Fixed or portable? The new FireDos pressure proportioner DZ1000 light can do both.

Thanks to its compact design, modular installation in fire engines is possible and with just a few simple steps, it transforms into a portable unit. It offers maximum flexibility in any operational situation.
